

The logo graphic features the text 'AETHERIA INTELLIGENCE' in a light blue, sans-serif font, centered against a dark, starry space background. Two vertical, glowing blue bars flank the text, and a horizontal blue line runs across the bottom of the central area.

AETHERIA INTELLIGENCE

Aetheria Intelligence

Constitutional governance infrastructure for AI execution

Thesis

Modern AI can plan and call tools, but authority is often informal. Aetheria Intelligence builds Aetheria to make execution governed: explicit permissioning, least privilege, and evidence you can audit.

Three pillars (high-level)

- Authority boundaries that constrain execution — not just model behavior.
- Capability-scoped control designed for least privilege and explicit authorization.
- Verifiable receipts that support audit, review, and accountability.

What it is not

- Not a foundation model.
- Not a chatbot product.
- Not a prompt-based policy wrapper.
- Not post-hoc monitoring presented as control.

Evaluation posture

We aim to be easy to evaluate without becoming a disclosure channel.

Public: principles, definitions, and outcome-level framing.

Under NDA: system briefings, evaluator-driven testing, and deeper demonstrations.

Not public: implementation details, security boundary internals, and capability minting logic.
